PRINCIPAL'S MESSAGE

Welcome to Senior School at Oberon High School. We are a small comprehensive secondary school offering a broad senior curriculum, excellent facilities and a strong wellbeing program.

As you commence your senior studies, you will find the opportunity to establish new friendships, develop new skills and the capacity to learn in depth about areas in which you have a special interest. As senior students, we expect that you participate in the full life of the school and take on the role as leaders of the school, setting an example to other students.

You will find a greater demand placed on your own personal organisational and planning skills in order to balance your school work with your social life, recreation and work pursuits.

There is an exciting wide range of course options in this book, therefore, we urge you to take this opportunity to think carefully about choosing the best pattern of study for you. Important issues to think about when you are contemplating choices — courses must include syllabus material that you find interesting, courses should be at a level of difficulty that you can honestly handle and do they align with your aspirations for further study or employment? As part of the selection process, we will meet with parents and individually with each student to help you make the best choice.

Completing the Higher School Certificate opens a world of opportunities for students, both in tertiary study and employment. I am sure you will find it a challenging but very rewarding experience.

Best wishes with your studies.

Tess Devine
Principal

Cameron Inwood
Year 11 Student Adviser (2024)

THE HIGHER SCHOOL CERTIFICATE (HSC)

Information can be found in the following NSW Education Standards Authority publication:-

Studying for the New South Wales Higher School Certificate - An Information Page for Year 10 students can be found on the NSW Education Standards Authority, internet site.

<https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/subject-selection>

The Higher School Certificate recognises 13 years of schooling. In the interests of greater career choices and increased opportunities at university and TAFE, it offers you a full range of study areas matching individual abilities, interests and goals.

Vocational Education and Training courses will count towards the Higher School Certificate and will also lead to qualifications recognised across a range of industries.

The Higher School Certificate includes life skills courses for students with special education needs.

The Higher School Certificate will fairly assess each student's knowledge and skills.

For each course you will receive easy-to-understand reports. These reports provide clear indications of what you have demonstrated you know, understand and can do in each course .

Compulsory School Leaving Age

The New South Wales Government passed the Education Amendment Bill 2009, which changed the school leaving age to 17 years of age. This means that after they complete Year 10 and until they turn 17 years of age, students must:

- participate in full time education and training (at school or TAFE); OR
- be employed in paid work for at least 25 hours per week; OR
- have a combination of paid work and education and training for a minimum of 25 hours per week.

Information Surety - The information provided in the booklet is correct at the time of printing.

NESA does change rules, regulations and syllabus content from time to time. Any variation that particularly relates to the 2024 High School Certificate will be published in the 2024—2025 version of the book.

ATTENDANCE REQUIREMENTS FOR SENIOR STUDENTS AT OBERON HIGH SCHOOL

Satisfactory attendance and progress in each course is expected of all senior students of Oberon High School.

Each student has the responsibility of accounting for all absences. Usually absences will be accounted for by a note from a student's parent or carer providing a legitimate reason for an absence. The principal determines if the reason is legitimate according to DET policy. Where an absence affects the completion of an assessment task in Year 12, a medical certificate must be supplied. Notes and certificates should be left at the school office immediately a student returns from an absence. The reason for the absence can then be directly entered into the school's computerised roll system ie - a legal requirement.

At Oberon High School, satisfactory attendance is normally described as being attendance of at least 90% of timetabled lessons in any one subject or course.

Procedures for monitoring attendance of senior students at Oberon High School

- Any late student must register with the office, and should provide a written reason for their lateness.
- Teachers will mark a class roll each lesson to ensure attendance requirements are met.
- Any student who needs to leave school for any reason during the day need to provide a written request to the Deputy Principal before school for approval.
- When students leave the school during the day, they must sign out at the school office before they leave, and they should also sign in upon their return. This is a safety issue.

Consequences of unsatisfactory attendance

- Parents or caregivers will be informed of unexplained absences, and be asked to provide an explanation.
- Where absences are likely to put the student at risk of being deemed as having unsatisfactory attendance (which will put course completion at risk) then an interview will be arranged for the student and parents/carers with the school principal or nominee to discuss the student's continued enrolment in the subject.
- Where absences are caused by such as illness or accident, the school will hold discussions with the student and parents/carers as to possible alternative arrangements which would allow the student to satisfy the requirements of all or some of the courses in which they are enrolled.
- Where a student's absences lead to unsatisfactory attendance then the principal will issue a formal warning to the student. If the attendance still remains unsatisfactory after the warnings have been issued, then the principal may inform the NSW Education Standards Authority that the student has not satisfied the requirements in the course(s) or subject(s) involved.
- Students are expected to satisfy the requirements of a subject or course in the Preliminary year before commencing HSC study.
- Students who do not satisfy the requirements of a subject or course in the Preliminary year will not be permitted to continue to study that subject or course in the Higher School Certificate year unless the requirements of the Preliminary year have been satisfactorily met by the time entries close for the HSC.
- Students who will be absent from school for a significant period of time, should apply to the principal for leave and make arrangements to complete course work whilst absent from school.

ENTERING SENIOR SCHOOL

The Preliminary course is the first part of the subject which must be completed successfully to continue into the Higher School Certificate course. Preliminary courses which are successfully completed are acknowledged on a Record of Achievement which is issued by NESA upon request. The Higher School Certificate course is the second component of the subject. It must be completed successfully to contribute to the award of the Higher School Certificate credential.

Students can take up to five years to complete the requirements of the Higher School Certificate. Students who are interested in spreading their Higher School Certificate over a number of years become part-time or pathways students. Anyone interested in this option should discuss the matter fully with the principal, who will offer advice as to what possibilities may be available. Part-time students may be able to include a traineeship in their program.

Some students may wish to study a course pattern that does not lead to the award of a Higher School Certificate. Satisfactory completion of these courses is acknowledged by a Record of Achievement.

It is important to note that alternative study patterns should not be viewed as an easy option. They will only be commenced after consultation and parent agreement. Students will still be subject to the normal requirements of NESA and the school.

SUBJECT CHOICE - GETTING IT RIGHT THE FIRST TIME

Choice should be based on the following:

- ability
- interest
- recommended studies

It is easier to get good results if ability and interest are the prime factors in subject choice. If the subject is too hard you will find that your years in senior school will be less than happy and rewarding for you. It is better to do very well in a course you find easier than to gain poor outcomes in a course you find hard. Realistic expectations of your ability to successfully perform in a subject is important. It is often one of the hardest parts of the decision making process to truthfully acknowledge.

When a specific subject is advertised as being recommended for a post-school course in which you are interested, make sure that you can manage the subject.

There are different pathways to achieve the same goal. It is possible to gain admission to university through completion of studies at TAFE. You can often get advanced standing and credit transfer through these studies. A further advantage is that the current cost structure means that study at EVET is considerably cheaper than the cost of paying HECS at university. This means it may be a good option for you to go to TAFE after school and then to university if you want to later on.

Vocational Education and Training (VET) offers many students the best choice if they aspire to directly enter specific industries. Make sure that you consider vocational education and its relevance to you. VET subjects can still be used in the Higher School Certificate as part of a pattern of study to enter university.

Adequate research of all the options is essential. Teachers, parents and experts in your interest areas should all be part of your decision making process. Making the correct choice the first time is essential, as changing a course, whilst possible always leads to an increased workload to catch up.

Do not choose a subject because a friend is doing it or because you have heard that marks are 'scaled up'. You should remember that doing "harder" subjects with the hope that you will gain a better ATAR will not work if you do poorly in them. You are far better choosing subjects that you will perform well in and then do your best. This will always lead to a better final result.

TERMS YOU NEED TO UNDERSTAND

Many specific terms are used in this booklet and it is important that you understand what each of them mean.

Australian Tertiary Admission Rank (ATAR): The Australian Tertiary Admission Rank is calculated using the results from each student's best two units of English, and best 8 units from other courses studied. However, no more than 2 units from Category B courses may be included. The ATAR is the basis for admission to university courses. It does not appear on the Higher School Certificate Record of Achievement, but is provided separately to students by the Universities Admission Centre (UAC).

Board Developed Courses (BDC): These courses are developed by NESA. There is a syllabus for each course which contains:

- the course objectives, structure, content and outcomes.
- specific course requirements.
- assessment requirements.
- sample examination papers and marking guidelines.
- the performance scale (except for Vocational Education and Training Courses).
- Board Developed Courses are designated Category A and Category B which does have implications for their use in calculating an ATAR.

All students entered for the Higher School Certificate who are studying these courses follow these syllabuses. These courses are examined externally at the end of the Higher School Certificate course and can count towards the calculation of the Australian Tertiary Admission Rank (ATAR).

Board Endorsed Courses (BEC): There are three main types of Board Endorsed Courses - Content Endorsed Courses, School Designed Courses and University Developed Courses.

Content Endorsed Courses (CEC) have syllabuses endorsed by the NSW Education Standards Authority to cater for areas of special interest not covered in the Board Developed Courses. Some Board Endorsed Courses are one-year courses.

Board Endorsed Courses do not have an external examination, however, students will be required to undertake school based assessment.

Matriculation: The minimum educational qualification necessary for entry to an undergraduate course at a university. It is important to see the school's careers adviser for up-to-date information about matriculation.

One Unit: A course of study that involves a teaching time of 60 indicative hours (4 hours per week).

Two Units: A course of study that involves a teaching time of 120 indicative hours (8 hours per week).

Extension Course: Extension courses build on the content of a 2 unit course and carry an additional value of 1 unit.

Unit Value: One unit of study is worth a possible 50 marks in the Higher School Certificate.

Assessment: The school's measure of a student's achievement in a particular course relative to other students in the same course/group for the Preliminary and Higher School Certificate courses.

Moderated Assessment Mark: The assessment tasks in a Higher School Certificate course contribute to a student's final assessment mark in that subject. That mark is submitted to the NSW Education Standards Authority at the end of the Higher School Certificate, and is then adjusted (moderated) according to students' performance in the Higher School Certificate examination in that specific subject. This forms the Moderated Assessment Mark. (It does not apply to assessment in a Preliminary Course.)

REQUIREMENTS FOR THE AWARD OF THE HIGHER SCHOOL CERTIFICATE

If you wish to be awarded the Higher School Certificate the following criteria must be met.

Students must have satisfactorily completed courses that meet the pattern of study required by NESA for the award of the Higher School Certificate. This includes the completion of the practical, oral or project works required for specific course and the assessment requirements for each course.

Students must have sat for and made a serious attempt at the Higher School Certificate examinations.

Students must study a minimum of 12 units in the Preliminary course and a minimum of 10 units in the Higher School Certificate course.

Both Preliminary course and the Higher School Certificate course must include the following:

- at least 6 units from Board Developed Courses including at least 2 units of a Board Developed Course in English
- at least three courses of 2 units value or greater
- at least four subjects

At most, 7 units of courses in Science can contribute to Higher School Certificate eligibility.

The NSW Education Standards Authority publication, *Studying for the New South Wales Higher School Certificate*, contains all the Higher School Certificate rules and requirements you will need to know. It can be found at <https://studentsonline.nesa.nsw.edu.au/documents/studying-for-the-nsw-hsc.pdf>

If you wish to receive the Australian Tertiary Admission Rank (ATAR), you must study a minimum of 10 Board Developed units in the Higher School Certificate. You can find information at the UAC site <https://www.uac.edu.au/future-applicants/year-10-students>

If you do not wish to receive an ATAR, the rest of your courses may be made up from Board Endorsed Courses once you have studied six units from Board Developed Courses.

Accumulation of the Higher School Certificate

Students may accumulate a Higher School Certificate over a five year period. The five year period will commence in the first year a student attempts a Higher School Certificate examination or completes a Higher School Certificate VET course. Students accumulating a Higher School Certificate will receive a Record of Achievement for each calendar year of study.

The accumulative record will show all Preliminary and Higher School Certificate courses satisfactorily completed, including repeat attempts. The mark of the final attempt on a particular course is the mark counted in the ATAR.

Acceleration

Students may undertake Preliminary or Higher School Certificate courses in advance of their usual cohort. Decisions about acceleration will be made in consultation with the principal. Students who are accelerated may be able to undertake a full pattern of senior studies or complete some senior subjects whilst completing other credentials such as the Year 10 RoSA.

OBERON HIGH SCHOOL REQUIREMENTS FOR PRELIMINARY AND HSC COURSE STUDY

All Preliminary course students will be required to study 12 school based units.

Students studying TAFE Courses will do so in addition to their prescribed school-based units.

Students undertaking extension courses in any subject will need to discuss their choice with the subject Head Teacher and then gain final approval from the Principal.

Oberon High School Requirements for Higher School Certificate course study.

All Higher School Certificate students will be required to study a minimum of 10 school-based units, unless an individual plan is negotiated with the Principal. Students will, therefore, carry forward a minimum of 5 of their Preliminary course subjects.

Students studying TAFE Courses will normally do so in addition to their prescribed school-based units.

Some extension subjects can be commenced at this time, however, this is to be discussed with the subject Head Teacher and gain final approval from the principal .

More About Units

All courses offered for the Higher School Certificate have a unit value. Subjects may have a value of 1 unit or 2 units. The majority of courses have a value of 2 units.

The following is a guideline to help you understand the pattern of courses.

2 Unit Course

This is the basic structure of all courses. It has a value of 100 marks.

Extension Course

Extension study is available in a number of subjects. Extension courses build on the content of the 2 unit course and carry an additional value of 1 unit. Requiring students to work beyond the standard of the 2 unit course, extension courses are available in English, Mathematics, History, Music, some Languages and VET. Undergraduate university courses will be available in some subjects.

English and Mathematics extension courses are available at Preliminary and Higher School Certificate. Students must study the Preliminary extension courses in these subjects before proceeding to the Higher School Certificate extension courses (Extension 1 and Extension 2). The Extension 2 course requires students to work beyond the standard of the Extension 1 course.

Higher School Certificate extension courses in subjects other than English and Mathematics are offered and examined in the Higher School Certificate course only.

MINIMUM STANDARDS HIGHER SCHOOL CERTIFICATE 2021 AND BEYOND

All students who aspire to the award of a Higher School Certificate from 2024 will need to demonstrate that they have achieved the minimum standard in reading, writing and numeracy.

Students who sat NAPLAN from 2018 onwards do not have the link between NAPLAN and the Higher School Certificate, however they will sit compulsory Minimum Standards tests in Year 10. If they cannot demonstrate the minimum standard in all three areas they will have further chances during Years 11 and 12 (Senior College).

In summary:

- Students who complete Year 12 will automatically achieve a Record of School Achievement (RoSA) which will list the subjects they have completed and the Higher School Certificate marks they have achieved.
- Students need to meet the minimum standard to receive a Higher School Certificate credential. **It does not stop them finishing Year 12 or sitting Higher School Certificate examinations.**
- Students who do not demonstrate the minimum standard for all three areas of reading, writing and numeracy have multiple opportunities in Year 11 and Year 12 to sit the test and achieve the standard.
- There will be an option to also demonstrate the minimum standard post school completion.
- Students who wish to apply for an ATAR can do so with or without a Higher School Certificate credential. The ATAR is administered by UAC who are independent of both NESA and the Department of Education.

You find out more information about the RoSA at:

<http://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/leaving-school/record-of-school-achievement>

You can find out more about the Minimum Standard tests at:

<http://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/hsc-minimum-standard>

You can find out more about online tests and Higher School Certificate eligibility at:

<http://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/hsc/hsc-minimum-standard/online-tests>

OPTIONS TO INCREASE YOUR CHOICE OF SUBJECTS

EVET (Technical and Further Education)

EVET has more students than all the universities combined.

EVET offers dual accreditation, HSC credits and advanced standing in some cases.

EVET has credit transfer arrangements with selected universities.

EVET offers a very large number of courses across a wide range of industries.

EVET courses are very much tailored to employer requirements. Hence EVET graduates have good employment potential.

EVET delivered VET course (TVET)

Commonly chosen EVET courses by students at OHS

Automotive (Examination)

Electro technology (Examination)

Information Technology (Examination)

Human Services (Examination)

Tourism and Events (Examination)

All courses are 2 unit in value.

EVET courses are Board Developed Courses delivered by TAFE.

As with school based VET courses an optional written examination will be offered for the HSC. If students want the results from an EVET course to be available for inclusion in the calculation of the ATAR, they must undertake the optional written examination.

Students must apply for EVET courses as part of their subject selection process using an EVET application. A handbook of all EVET courses on offer for 2024 will be available through Mrs Fitzpatrick. EVET is offered to schools each year with the final decision about courses running in 2024 made by EVET administration.

Distance Education (DE)

Distance Education allows students to undertake courses that cannot be offered at our school due to minimal student interest or staff expertise in niche areas not available. Distance Education can be accessed through an application process which must be completed by the end of November each year. There are a variety of Distance Education centres across NSW, however, we traditionally have dealt with Dubbo School of Distance Education. If you are interested in accessing Distance Education you can view courses available and general information on their website which can be found at <http://www.dubbo-d.schools.nsw.edu.au/>

Students must be aware that Distance Education relies on a great deal of independent work and an ability to stay motivated and therefore up to date with course work. Courses are coordinated by staff at Distance Education with supervision provided by Oberon High School available, however, there are no timetabled lessons.

Distance Education courses attract an annual fee. Course fees can be found on the website and must be paid upon application.

Students will receive a report and any other official documentation from the Distance Education centre for their selected course. They will, however, sit the Higher School Certificate examination for their selected course at our examination centre.

Distance Education offers both Board Developed Courses and Board Endorsed Courses. Students can only undertake courses in this mode if the school supports the application.

The majority of students at our school do not have to complete a subject via Distance Education, however, over the last two years we have had students complete Higher School Certificate courses in a variety of areas to support their subject pattern.

Aurora College

Aurora College is a Rural and Remote initiative that has enrolments from Stage 4 to Stage 6. Aurora College offer a range of Stage 6 subjects that rural schools often cannot run due to small student numbers or a lack of staff expertise.

As for Distance Education there is an application process for enrolment in this college that must be supported by the school. Applications must clearly demonstrate that students cannot access a desired subject at their home school.

Aurora College does not offer the range of subjects that Dubbo School of Distance Education can offer, however, for students already enrolled in Stage 5 at Aurora College it offers a simpler transition process.

If you wish to find out more information about Aurora College and the subjects on offer you can access this on their website at <https://aurora.nsw.edu.au/learning/senior-school/>

WILL MY SUBJECT RUN?

The subject selection process and the College structure aims to match students with courses where possible. While many Stage 6 subjects are offered to students, not all of these courses run every year at Oberon High School. Course availability is determined by student interest, staff abilities, and number of students in the College. Past years have shown these patterns in course availability

High Demand Courses that run regularly.

- All Mathematics courses
- All English courses
- Biology
- Chemistry
- Investigating Science
- Legal Studies
- Physics
- Society and Culture
- Business Studies
- PDHPE
- Sport, Lifestyle and Recreation
- VET Certificate II in Rural Operations (Primary Industries)
- VET Certificate II in Kitchen Operations (Hospitality)
- Agriculture
- VET Certificate II in Construction Pathways (Construction)
- Photography, Video and Digital Imaging
- Visual Arts
- Community and Family Studies

Course that run less regularly.

- Ancient History
- Drama
- Visual Design
- Exploring Early Childhood
- Industrial Technology and Graphics
- Engineering Studies (Timber and Graphics)

Courses that rarely run but with student interest could run

- Earth and Environmental Science
- VET Certificate III Information and Digital Technology (Information Technology)

New Choice for 2024-2025

- Industrial Technology Metals

VOCATIONAL EDUCATION AND TRAINING

BOARD DEVELOPED OR BOARD ENDORSED

Vocational Education and Training (VET) courses are offered as part of the Higher School Certificate. They enable students to study courses which are relevant to industry needs and have clear links to post-school employment opportunities. These courses allow students to gain both Higher School Certificate qualifications and accreditation with industry and the workplace as part of the Australian Qualifications Framework (AQF).

The national framework is recognised across Australia and helps students to move easily between the various education and training sectors and employment. These courses each have a specific workplace component and a minimum number of hours students spend in the workplace or a simulated workplace at school.

Students receive documentation showing the competencies gained. Some of these courses will be delivered by schools, while others will be delivered by EVET or appropriately credentialed providers.

VET courses are Board Developed Courses, Category B. This has implications for their inclusion in an ATAR but it also gives students the flexibility of choosing to sit a Higher School Certificate examination or opting out as their pattern of study does not require the examination to be completed.

VET courses are not easy option courses as the syllabus material is based around industry recognition. Industry confidence can only be assured if the integrity of assessment is strong and fairly assesses student competence against agreed standards. Students must recognise this fact when selecting VET courses. They must also recognise the mandatory nature of work related placement in each VET course. There are no alternatives to the work placement, therefore, students are encouraged to not select VET courses if they will not undertake this mandatory part of course completion.

Oberon High School offers a range of VET courses, the most popular traditionally being Construction, Hospitality, Metals and Engineering and Primary Industries.

Specific information about VET courses can be found in the section listing the Higher School Certificate courses on offer at our school.

THE AUSTRALIAN TERTIARY ADMISSION RANK (ATAR)

Requirements including Category A and B Courses

Students who wish to apply for University admission must not only fulfil Higher School Certificate requirements but must also receive an Australian Tertiary Admission Rank (ATAR).

The ATAR is a number between 0 and 99.95 with increments of 0.05. It provides a measure of your overall academic achievement in the NSW Higher School Certificate in relation to that of other students, and it helps universities rank applicants for selection. It is calculated on behalf of the universities and released by the Universities Admission Centre (UAC). The ATAR is a rank, not a mark.

Eligibility for an ATAR

To be eligible for an ATAR you must satisfactorily complete at least 10 units of ATAR courses. These ATAR courses must include at least:

- eight units from Category A courses
- two units of English
- three Board Developed courses of two units
- four subjects.
- **no more than two units of Category B courses**

Calculation of the ATAR

Your ATAR is based on an aggregate of scaled marks* in 10 units of ATAR courses comprising:

- your best two units of English and
- your best eight units from the remaining units

* Scaled marks are not NSW Education Standards Authority HIGHER SCHOOL CERTIFICATE marks.

More information on the calculation of the ATAR can be found on the UAC's website at:

<https://www.uac.edu.au/future-applicants/atar>

ASSESSMENT AND REPORTING

Higher School Certificate reports will provide you with detailed descriptions of the knowledge, skills and understanding you have attained in each subject. Higher School Certificate reports will provide a description of your performance that clearly outlines the level of your achievement.

School-based assessment tasks will contribute to 50% of your Higher School Certificate mark. Your school assessment mark will be based on your performance in assessment tasks you have undertaken during the course. The other 50% will be determined by your performance in the Higher School Certificate examination.

Your Higher School Certificate mark for 2 unit courses will be reported on a scale of 0 to 100. If you achieve the minimum standard expected in a course you will receive a mark of 50. There will be five performance bands above 50 that correspond to different levels of achievement in knowledge, skills and understanding. The band from 90 - 100 will correspond to the highest level of achievement.

On satisfactory completion of your Higher School Certificate you will receive a portfolio containing the Higher School Certificate Testamur (the official certificate confirming your achievement of all requirements for the award) and the Record of Achievement (lists the courses you have studied and reports the marks and bands you have achieved).

For every Higher School Certificate Board Developed Course you will receive a Course Report showing your marks, the Performance Scale and the band descriptions for that course. A graph showing the state wide distribution of marks in the course is also shown.

If your course of study does not meet the pattern required for the Higher School Certificate your achievements will be recorded on a Record of Achievement.

Selecting your Pattern of Study

It is absolutely essential to seek as much information as possible before finalising your choices for 2024. Inappropriate subject selection is a major contributor to student dissatisfaction and poor performance in senior school. This will become even more critical as in a compressed structure the opportunity for students to change is limited once they have completed more than a couple of weeks of course material.

Subject selection is a process with several steps with the intention of building your knowledge of subjects available and then trying to match your future aspiration with courses available. The process of subject selection is outlined below:

- Initial survey in Term 1 which staff were given an opportunity to comment on, based around their professional knowledge of your progress in Year 10.
- Careers classes where you can access information about future aspirations.
- Subject selection evening where information about completing your Higher School Certificate is discussed as well as having access to key staff in the school to ask questions.
- Career Planning Interviews that give you and your parent/carer an opportunity to discuss your subject selection with the careers advisor and another staff member experienced in curriculum.

Subject teachers - can advise you about curriculum in their area, particularly syllabus content and the special requirements of subjects which require major works to be completed.

Careers adviser - can help you obtain information on requirements for tertiary study and employment, EVET, on the relationship of your school study with the working world, general assistance in your decision-making and advice on industry experts who may be able to advise you directly.

Year Adviser - can provide overall support during this intense and often stressful time.

Take the initiative and independently investigate career and employment opportunities, and appropriate training. Tertiary institutions, EVET, private providers and many companies/businesses offer outreach services to better inform you and thus enhance your decision making process.

HOW WILL I COMPLETE MY COURSES IN 2024/2025

You will be required to choose a minimum of 12 units for the Preliminary which for most students represents six subjects.

Even though you make the selection of six subjects only three of them will be completed in 2024. The final three will be completed in 2025.

It is important to realise that completing three subjects only in 2024 means you complete both the Preliminary Course and Higher School Certificate Course in the same 12 months. Consequently you may be sitting three Higher School Certificate examinations in 2024.

To ensure that you meet the mandatory hours specified for each course you will commence the Preliminary Course (Year 11) mid-way through Term 4 this year.

The general timeline for course completion in 2024 and 2025 is shown below.

Year 11 (2023)

OSC (Red) Preliminary Course starts Week 6, Term 4, 2023

OSC (Red) Preliminary Course finishes at the end of Term 1, 2024

OSC (Red) HSC Course starts Term 2, 2024

OSC (Red) HSC Course finishes at the end of Term 3, 2024

HSC examinations occur Week 1-5 Term 4, 2024

Students **pick 3 subjects** to start Preliminary

Students continue with the same 3 subjects in the HSC during the same year

Year 12 (2024)

OSC (Black) Preliminary Course starts Week 6, Term 4, 2024

OSC (Black) Preliminary Course finishes at the end of Term 1, 2025

OSC (Black) HSC Course starts Term 2, 2025

OSC (Black) HSC Course finishes at the end of Term 3, 2025

HSC examinations occur Week 1-5 Term 4, 2025

Students **pick another 3 subjects** to start Preliminary

Students continue with the same 3 subjects in the HSC during the same year

LIFE SKILLS COURSES AS PART OF A SPECIAL PROGRAM OF STUDY

Stage 6 (Years 11 and 12) Life Skills courses are available for students following a Special Program of Study for the Higher School Certificate.

Students accessing a Special program of Study in Stage 6 will, in general, need to have Life Skills courses within a Special program of Study in Stage 5 (Years 9 and 10). Further, participation in a Special Program of Study will be based upon an individual transition-planning process which will occur for both the Preliminary and Higher School Certificate years.

Life Skills courses will have Board Developed status and can be used in place of other Board Developed courses to meet requirements for the award of the Higher School Certificate. Each Life Skills course comprises a 2 unit Preliminary course and a 2 unit Higher School Certificate course.

NESA expects that most students would meet the outcomes for a 2 unit Preliminary course and a 2 unit Higher School Certificate course over approximately 240 indicative hours in total (that is, 120 indicative hours in each course).

Additional Information for Students in Year 10 on the Transition Program.

To help you fill out your subject choices for next year:

During Year 11 and 12 you will be continuing on a Special Program of Study as a Transition Student at Oberon High School. This program is best suited to your learning needs and your future employment needs as it gives you the opportunity to develop skills at work and at school at the same time. It also gives you the opportunity to choose those subjects at school best suited to your interests.

As a participant of our Transition Education Program you will be able to participate in further Work Placements of up to three days a week in the community and hopefully find yourself a job for the future with one of those employers who gets to know you and likes the conscientious way you work.

Your subject choices will be more flexible than those of students completing the mainstream Higher School Certificate and your courses will be modified to meet your needs for as long as you need to stay at school. Of course, if you get offered a suitable job in the community while on work experience, then you are free to leave school to go to your new job. It is therefore important that you choose your work placements next year to suit your interests and skills so that you will get as much experience as you can for a particular area of work.

If you stay on at school until the end of Year 12, you will receive the Higher School Certificate, a Record of Achievement (which outlines all courses satisfactorily completed and a result) and a Student Profile, which is a record of all outcomes achieved by the student.

Life skill courses may form all or part of a Special program of Study. You can do any 6 subjects from the eight Life skills courses or you may choose to do a mixture of courses from Life skills and from other courses.

You should still aim for 12 units in the subjects you choose, to fulfil Austudy and Government enrolment requirements but these can be adapted if necessary during the year depending on how much work experience you want to do in senior school.

LIFE SKILLS

INTRODUCTION

These courses provide access for some students to follow Special Programs of Study to attain the HSC in 2025. The aim of each Stage 6 Life Skills course is to prepare students for a range of post-school environments in which knowledge, understanding, skills and values and attitudes are used to achieve greater participation and independence.

Students entering for a Special program of Study can do a combination of courses through:

Board Developed Life Skills courses and/or

Board Developed syllabuses and/or

Board Endorsed courses and/or

Content Endorsed courses

WHO WOULD THE COURSE SUIT?

Enquiries about Life Skills should be directed to Learning Support Team.

COURSE CONTENT

English Life Skills

Mathematics Life Skills

Personal Development, Health and Physical Education Life Skills

Science Life Skills

Creative Arts Life Skills

Technological and Applied Studies Life Skills

HSIE Life Skills

PARTICULAR REQUIREMENTS

Students will be enrolled in Life Skills courses only as a result of individual planning processes involving students, parents and school staff. Transition students can also be selected to attend a beginning EVET course at Bathurst EVET by requesting a particular course at your Individual Planning Meeting each semester. These courses help you make the transition to further education at EVET if you should want to go after leaving school if a local employer offers you an apprenticeship.

ASSESSMENT

Assessment is determined by the Life Skills courses the student is participating in. For more information enquiries can be directed to the Learning Support Team.

FOR MORE INFORMATION

Learning Support Team.

AGRICULTURE

INTRODUCTION

The Preliminary Agriculture course is an on-farm oriented course that looks at how animal, plant and resource systems interact within a farming environment. Areas of study include the climate and soil systems, plant and animal systems, and farm management. The HSC course expands on each of these areas with particular emphasis on sustainability issues. A product is studied in detail from paddock to plate with emphasis on marketing and quality factors affecting that product.

WHO WOULD THE COURSE SUIT?

This would suit students wishing to work in rural industries, both on and off-farm. It is a more academic course than Primary Industries.

COURSE CONTENT

Preliminary Course

- Overview
- The Farm Case Study
- Plant Production
- Animal Production

HSC Course

- Plant/Animal Production
- Farm Product Study
- Elective Chosen From
 - Agri-food,
 - Fibre and Fuel Technologies
 - Climate Challenge
 - Farming for the 21st Century

PARTICULAR REQUIREMENTS

Practical experiences will occupy a minimum of 30% of course time and will involve an on-farm case study.

ASSESSMENT

Students will be assessed using a range of techniques including examinations, case study and practical investigations and research tasks.

ANCIENT HISTORY

INTRODUCTION

In Ancient History we learn the mysteries of the ancient world. We use curiosity and imagination to investigate early societies, through analysis and interpretation of physical and written remains, to understand individuals and groups, and how they shaped their world. Our studies develop transferable skills including critical thinking about events and issues and skills to analyse and challenge accepted theories. We form opinions and interpretations and learn how to use effective communication to convey ideas and judgements.

WHO WOULD THE COURSE SUIT?

Students will need a personal interest in investigation and the willingness to form their own opinions then defend them using evidence.

COURSE CONTENT

Preliminary Course:

- Investigating Ancient History: Nature of Ancient History and Case studies (60 hours)
- Features of ancient societies (40 hours)
- Historical investigation (20 hours)

HSC Mandatory Course:

- Core study: Cities of Vesuvius - Pompeii and Herculaneum (30 hours)
- Ancient Societies (30 hours)
- Personalities in their time (30 hours)
- Historical period (30 hours)

PARTICULAR REQUIREMENTS

The Preliminary course is a prerequisite for the HSC course.

ASSESSMENT

Tasks will include source interpretation/analysis, essay and a speech. One task requires you to research and express an opinion on an inquiry question set for yourself.

BIOLOGY

INTRODUCTION

Biology is the study of living organisms, life processes and interactions between organisms and their environment. The Year 11 course investigates cellular structure and provides a base for understanding the way in which multicellular organisms transport and absorb nutrients and carry out gas exchange. It also explores variations in the structures and functions of organisms and provides an understanding of the effects of the environment on living things and how this leads to biodiversity. The Year 12 course investigates reproduction, inheritance patterns and the causes of genetic variation in both plants and animals. Applications of this knowledge in biotechnology and various genetic technologies are explored in the light of their uses in the treatment, prevention and control of infectious and non-infectious diseases.

WHO WOULD THE COURSE SUIT?

Students wishing to develop a career path along any scientific field. It is also recommended for students considering education, nursing, agriculture or a general pattern of study.

COURSE CONTENT

Preliminary Course:

- Cells as the Basis of Life
- Organisation of Living Things
- Biological Diversity
- Ecosystem Dynamics

HSC Mandatory Course:

- Heredity
- Genetic Change
- Infectious Disease
- Non-infectious Disease and Disorders

PARTICULAR REQUIREMENTS

Students are provided with 15 hours of course time for depth studies in both Year 11 and Year 12. During this time students may undertake an investigation/activity that allows for the further development of one or more scientific concepts.

A depth study may be one investigation/activity or a series of investigations/activities. Depth studies may be included in one module or across several modules.

Practical investigations are an essential part of the Year 11 and Year 12 courses and must occupy a minimum of 35 hours of course time each year.

Fieldwork is also mandated in Year 11 and is an integral part of the learning process

ASSESSMENT

The Preliminary will consist of three assessment tasks. A depth study, a second hand investigation and a final examination. The HSC course will consist of three assessment tasks. A a second hand investigation, depth study and a final examination.

BUSINESS STUDIES

INTRODUCTION

This course is designed to give an easy and practical insight into the basic principles of small business management, so that when a bright idea for a new business emerges, it is considered with common sense, planning and advice. Students will cover the essential elements of a business plan including marketing, operations and basic accounting. It will help students to analyse and make informed decisions about their finances, both personal and business. Business Studies aims to prepare all students for a future where they will need to identify possibilities and create opportunities within a business environment. It aims to empower students to make business decisions based on critical thinking and to be proactive participants in the dynamic world of business.

WHO WOULD THE COURSE SUIT?

Students with an interest in starting their own business.

COURSE CONTENT

Main Topics Covered: Preliminary Course:

- Nature of Business
- Business Management
- Business Planning

HSC Course:

- Marketing
- Human Resources
- Operations
- Finance

ASSESSMENT

Knowledge and understanding of course content stimulus-based skills, inquiry and research, communication of business information, ideas and issues in appropriate forms.

CHEMISTRY

INTRODUCTION

The Year 11 course develops the knowledge, understanding and skills in relation to the properties and structures of matter, the types and drivers of chemical reactions and how we measure the quantities involved in these processes.

The Year 12 course builds on the concepts introduced in Year 11 by examining particular classes of chemicals, processes and a variety of chemical reactions which incorporate organic compounds and acid/base equilibrium reactions. The course challenges students to apply this knowledge to the investigation of a range of methods used in identifying and measuring quantities of chemicals which leads to an understanding of the structure, properties and trends of and between classes of chemicals.

WHO WOULD THE COURSE SUIT?

Students undertaking a career path in bio-chemistry, bio-technology, analytical, industrial chemistry or pharmacy including medicine.

COURSE CONTENT

Preliminary Course:

- Properties and Structure of Matter
- Introduction to Quantitative Chemistry
- Reactive Chemistry
- Drivers of Reactions

HSC Course:

- Equilibrium and Acid Reactions
- Acid/base Reactions
- Organic Chemistry
- Applying Chemical Ideas

PARTICULAR REQUIREMENTS

Students are provided with 15 hours of course time for depth studies in both Year 11 and Year 12. During this time students may undertake an investigation/activity that allows for the further development of one or more scientific concepts.

A depth study may be one investigation/activity or a series of investigations/activities. Depth studies may be included in one module or across several modules.

Practical investigations are an essential part of the Year 11 and Year 12 courses and must occupy a minimum of 35 hours of course time each year.

ASSESSMENT

The Preliminary will consist of three assessment tasks. A depth study, a second hand investigation and a final examination. The HSC course will consist of three assessment tasks. A depth study which could be either a second hand investigation, depth study and a final examination.

COMMUNITY AND FAMILY STUDIES

INTRODUCTION

This course utilises an ecological framework to investigate the interactions among the individual, the family, the community and society. Students learn the ability to manage resources and support the needs of all of those concerned. The course then builds upon this by examining how the well-being of individuals, families and communities are affected by broader societal influences including socio-cultural, economic and political factors.

WHO WOULD THE COURSE SUIT?

Students who want to pursue a pathway into helping society and the well-being of family as well as the local population.

COURSE CONTENT

The Preliminary Course consists of three mandatory modules:

- Resource Management
- Individuals and Groups
- Families and Communities

The HSC Course has three Core modules plus an extra module.

- Research Methodology
- Groups in context
- Parenting and Caring

Choose one from:

- Social Impact of Technology
- Individuals and Work
- Family and Societal Interactions

Each HSC module is worth 25% of the allocated course time.

PARTICULAR REQUIREMENTS

Students will need to complete an Independent Research Project (IRP).

ASSESSMENT

The HSC exam is 3 hours long. One option topic is examined.

DRAMA

INTRODUCTION

Drama is an art form that explores the world through enactment. It is collaborative and involves the creative interaction of individuals using a range of artistic skills. Students acquire skills in interpretation, communication, performance and critical analysis and become aware of the technical processes and technologies that may be used to heighten dramatic presentation. In the critical study of drama and theatre students can recognise the collaborative contribution of actors, directors, playwrights, designers and technicians to production. They develop an understanding of the cultural traditions and social contexts of drama and theatre.

WHO WOULD THE COURSE SUIT?

Students interested in drama, theatre production and performance.

COURSE CONTENT

Preliminary course:

- Improvisation, Playbuilding, Acting
- Elements of Production in Performance
- Theatrical Traditions and Performance Styles

HSC Course:

- Australian drama and theatre
- Studies in drama and theatre
- Group performance
- Individual project.

Students will submit and/or complete the practical components of the HSC course in term 3 (60%) and a written examination in term 4 (40%)

PARTICULAR REQUIREMENTS

Students must be aware that drama is a **performing arts subject** and students are required to make, perform and critically study the course content.

ASSESSMENT

Performance, logbook, research, essay, individual project and workshop presentation.

EARTH AND ENVIRONMENTAL SCIENCE

INTRODUCTION

The Year 11 course investigates compositional layers of the Earth, the origins of minerals, tectonic movements and energy transformations that occur and includes the study of human impact on the Earth's resources and its surface.

The Year 12 course investigates how the processes of plate tectonics, the formation of water and the introduction of life interact with the atmosphere, hydrosphere, lithosphere and climate. Investigation of hazards, the mitigation of their effects and resource management are also considered which leads to an understanding of the need to centralise the theme of sustainability for the long term welfare of our planet and all forms of life dependent upon it.

COURSE CONTENT

Preliminary Course:

- Earth's Resources
- Plate Tectonics
- Energy Transformations
- Human Impacts

HSC Course:

- Earth's Processes
- Hazards
- Climate Science
- Resource Management

PARTICULAR REQUIREMENTS

Students are provided with 15 hours of course time for depth studies in both Year 11 and Year 12. During this time students may undertake an investigation/activity that allows for the further development of one or more scientific concepts.

A depth study may be one investigation/activity or a series of investigations/activities. Depth studies may be included in one module or across several modules.

Practical investigations are an essential part of the Year 11 and Year 12 courses and must occupy a minimum of 35 hours of course time each year.

Fieldwork is mandated in both Year 11 and Year 12 and is an integral part of the learning process.

ASSESSMENT

The preliminary and HSC courses will each consist of three assessment tasks respectively: A Depth Study, a second hand investigation and a final examination.

ENGINEERING STUDIES

INTRODUCTION

This course is unique in that it develops knowledge and understanding of the profession of engineering. It also provides an opportunity to integrate the science and mathematics disciplines with societal development and change. The syllabus is inclusive of the needs, interests and aspirations of all students and provides opportunities and challenges to deal with engineering concepts. Students undertaking Engineering Studies Stage 6 will have the opportunity to follow a number of pathways. These include tertiary study, vocational education and training, and the world of work. For those following a pathway of further study, the insight and experience associated with a study of engineering will be beneficial in their presumed knowledge of the area of study. Students entering into the world of work will benefit from understanding what engineers do, as the work of engineers affects us all.

WHO WOULD THE COURSE SUIT?

This course is suited to students interested in pursuing careers in Engineering.

COURSE CONTENT

Concepts and knowledge relating to engineering, history, materials, physical design principles and effective communication methods are dealt with throughout the course in core application modules.

Preliminary Course:

Household appliances, Landscape products, Braking systems, Bio engineering and a School based elective

HSC Course:

Personal and Public Transport, Civil Structures, Lifting devices, Aeronautical Engineering and Telecommunications Engineering .

PARTICULAR REQUIREMENTS

For each module, students will be required to complete an Engineering report. The report varies in purpose and depth with later reports in Preliminary and HSC course requiring higher levels of research, analysis and synthesis of subject related problems. Students will also be required to formulate their own conclusions in detailed reports.

ASSESSMENT

The course is assessed using theoretical booklets, practical projects, class tests and examinations.

ENGLISH ADVANCED

INTRODUCTION

English Advanced is designed for students to undertake the challenge of higher-order thinking to enhance their personal, social and vocational lives. These students apply critical and creative skills in their composition of and response to texts in order to develop their academic achievement through understanding the nature and function of complex texts.

WHO WOULD THE COURSE SUIT?

Advanced English is a rigorous course for students who are good at or have an affinity with literature. Students who aspire to further study would particularly benefit from this course.

SHOULD I DO EXTENSION ENGLISH?

- I love English and my Year 10 English teacher believes that I can cope with the demands of this course
- Shakespeare is compulsory! Yippee!
- I am a skilled writer who is willing to devote time to develop this skill further
- I like to think critically and express my individual ideas
- I am a keen reader and read widely across genres and enjoy the classics
- I am motivated and organised and understand I am going to have to complete homework and independent research
- I am considering studying English related subjects at university
- I would like to do Extension 1 and/or Extension 2

COURSE CONTENT

In English Advanced, students will complete:

Preliminary Course:

- Common Module (Standard and Advanced) *Reading to Write*
- Advanced Module A: *Narratives that Shape our World*
- Advanced Module B: *Critical Study of Literature*

HSC Course:

- Common Module (Studies, Standard and Advanced)– *Texts and Human Experiences*
- Module A: *Textual Conversations*
- Module B: *Critical Study of Literature*
- Module C: *The Craft of Writing*

PARTICULAR REQUIREMENTS

- English is compulsory for the HSC
- Advanced and Extension English involve completing external HSC exams
- All English courses require regular homework and independent research

ASSESSMENT

All English courses require the assessment of reading, writing, speaking, listening, viewing and representing.

ENGLISH EXTENSION 1 & 2

INTRODUCTION

English Extension is designed for students to explore how and why texts are valued in and appropriated into a range of contexts. They consider why some texts may be perceived as culturally significant. The study of Extension English complements what is studied in Advanced English.

WHO WOULD THE COURSE SUIT?

Students who have an affinity with all things literature who enjoy the challenge of accessing a range of classic and contemporary texts.

SHOULD I DO EXTENSION ENGLISH?

- I have selected Advanced English
- English is one of my favourite subjects
- I am a skilled writer who is keen to continue to develop in this area
- I am a skilled public speaker
- I am self-motivated and have well developed organisational skills
- I am prepared to work independently and am a keen reader of a variety of texts
- I would like to select Extension 2 English in the HSC phase

COURSE CONTENT

In English Extension 1, students will complete:

Preliminary: Course

- Texts, culture and value

HSC Course:

- Literary Worlds
- Elective

In English Extension 2, students will complete:

HSC Course:

The composition process

- Major Work
- Reflection Statement
- The Major Work Journal

PARTICULAR REQUIREMENTS

Students must be studying **Advanced English** to be able to access **Extension 1 & 2**. Students need to be prepared to undertake independent research.

ASSESSMENT

ALL English courses require the assessment of reading, writing, speaking, listening, viewing and representing.

INTRODUCTION

English Standard is designed for students to increase their expertise in English in order to enhance their personal, social and vocational lives. The students learn to respond to and compose a wide variety of texts in a range of situations in order to be effective, creative and confident communicators. Students are required to: study Australian and other texts; explore a range of types of text drawn from prose fiction, drama, poetry, film media and/or multimedia texts; undertake wide reading programs; compose texts of increasing complexity including essays, and engage in the integrated study of language and text.

WHO WOULD THE COURSE SUIT?

Students who enjoy the challenge of interesting and engaging texts that come from a range of forms.

SHOULD I DO STANDARD ENGLISH?

- I have performed satisfactorily in Year 10 English
- I am not that keen on Shakespeare, I prefer more modern texts
- I need assistance in developing my extended writing
- **I need 2 units of English for university study**
- I am prepared for homework and independent study

COURSE CONTENT

In English Standard, students will complete:

Preliminary Course:

- Common Module - (Standard and Advanced) Reading to Write
- Standard Module 1: Contemporary Possibilities
- Standard Module 2: Close Study of Literature

HSC Course:

- Common Module - (Studies, Standard and Advanced) Texts and Human Experiences
- Module A: Language, Identity and Culture
- Module B: Close Study of Literature
- Module C: The Craft of Writing

PARTICULAR REQUIREMENTS

- English is compulsory for the HSC
- Standard English involves completing external HSC exams
- If you elect to receive an ATAR to get into university, in addition to your HSC, then your English result will automatically be counted, regardless of your mark
- All English courses require regular homework and independent research

ASSESSMENT

All courses require the assessment of reading, writing, speaking, listening, viewing and representing

ENGLISH STUDIES

INTRODUCTION

The English Studies course is an engaging and flexible way of examining the way language works in many areas of our world.

WHO WOULD THE COURSE SUIT?

This course is designed for students who may or may not require an ATAR and are not particularly engaged with the traditional delivery of English subjects. Students will find the flexible pattern of study relevant and engaging.

- I am very good at other subjects, but I would not put English in my top 3 subjects in year 10.
- I understand that students who complete English Studies have the option of obtaining an ATAR if they sit the external exam and depending on their pattern of study.
- I have vocational aspirations – I know what I want to do when I leave school and it does not involve going to university.

COURSE CONTENT

In English Studies, students will complete:

Preliminary Course:

- Mandatory Module Achieving Through English
- 2-3 Electives

HSC Course:

- Common Module (Studies, Standard and Advanced) Texts and Human Experiences
- 2-3 Electives

PARTICULAR REQUIREMENTS

In **English Studies**, students must have a willingness to engage with a variety of texts and participate actively in the course.

- English is compulsory for the HSC
- English Studies has an optional exam, depending on the students pattern of study

ASSESSMENT

All English courses require the assessment of reading, writing, speaking, listening, viewing and representing.

Students studying the English Studies course may elect to undertake an optional HSC Examination, depending on their pattern of study.

EXPLORING EARLY CHILDHOOD

INTRODUCTION

Exploring Early Childhood, Stage 6, aims to develop understanding, skills and strategies to enable students to support and foster positive growth and development in the young children with whom they interact through the provision of safe, nurturing and challenging environments. As well as reflecting on the personal relevance of childhood issues, students are encouraged to consider the implications for future interactions with children, be these as a parent, friend, carer or educator.

WHO WOULD THE COURSE SUIT?

Students interested in careers in long day care and pre-school.

COURSE CONTENT

Core Studies

The core studies are compulsory. There are three parts to the core:

- Part A: Pregnancy and Childbirth (15 hrs)
- Part B: Child Growth and Development (20 hrs)
- Part C: Promoting Positive Behaviour (10 hrs)

Optional Modules

These 14 modules are optional and will be negotiated with students and their teacher.

1. Learning Experiences for Young Children
2. Play and the Developing Child
3. Starting School
4. Gender and Young Children
5. Children and Change
6. Children of Aboriginal and Torres Strait Islander Communities
7. Historical and Cultural Contexts of Childhood
8. The Children's Services Industry
9. Young Children and Media
10. Young Children and the Law
11. Children's Literature
12. Food and Nutrition
13. Child Health and Safety
14. Young Children with Special Needs.

PARTICULAR REQUIREMENTS

INDUSTRIAL TECHNOLOGY (METAL AND ENGINEERING TECHNOLOGY)

INTRODUCTION

Industrial Technology seeks to raise students' awareness of the interaction between technology, industry, society and the environment, and to develop their ability to make value judgements about issues, decisions and problems arising from this interaction. Students achieve this by applying practical experiences to the study of the technology, management and organisation of industry.

The Focus Area is Metal and Engineering Technology. Students will undertake project work and a study of Industry to help develop a broad range of skills and knowledge related to the metals industry and an introduction to industrial processes and practices.

WHO WOULD THE COURSE SUIT?

This course is suited to students interested in pursuing a career in the metal manufacturing industries.

COURSE CONTENT

Preliminary Course:

Industry Study - structural, technical, environmental and sociological, personnel, Occupational Health and Safety Design and Management - designing, drawing, computer applications, project management, workplace communication - literacy, calculations, graphics, the metal and engineering industry , project construction

HSC Course:

- Study of the Metal and Engineering Industry.
- Construction of a major project using metal.

PARTICULAR REQUIREMENTS

In the Preliminary course, students must design, develop and construct a number of projects (at least one group project). Each project must include a management folio. Students also undertake the study of an individual business within the industry. In the HSC course, students must design, develop and construct a major project with a management folio. They also undertake a study of the Metal and Engineering Industry.

ASSESSMENT

This course is assessed using practical projects, management and communication folio's and Examinations. The practical component is worth 60% of the course assessment in both the Preliminary and HSC courses. The Major Project in the HSC course is worth 60% and is externally assessed by examiners. The mark obtained goes directly to the HSC assessment for the course.

WORK
PLACEMENT

INTRODUCTION

The Year 11 course focuses on the centrality of observation in initiating the scientific process and examines the human tendency to draw inferences and make generalisations from these observations. Students learn about the development and use of scientific models and the similarities and differences between scientific theories and laws.

The Year 12 course builds on the skills and concepts learnt in Year 11 with students conducting their own scientific investigations and communicating their findings in scientific reports. Students are provided with the opportunity to examine the interdependent relationship between science and technology and apply their knowledge, understanding and skills to scientifically examine a claim. The course concludes with students exploring the ethical, social, economic and political influences on science and scientific research in the modern world.

COURSE CONTENT

Preliminary Course:

- Cause and Effect – Observing
- Cause and Effect – Inferences and Generalisations
- Scientific Models
- Theories and Laws

HSC Course:

- Scientific Investigations
- Technologies
- Fact or Fallacy?
- Science and Society

PARTICULAR REQUIREMENTS

Students are provided with 30 hours of course time for depth studies in both Year 11 and Year 12. During this time students may undertake an investigation/activity that allows for the further development of one or more scientific concepts.

A depth study may be one investigation/activity or a series of investigations/activities. Depth studies may be included in one module or across several modules.

Practical investigations are an essential part of the Year 11 and Year 12 courses and must occupy a minimum of 35 hours of course time each year.

ASSESSMENT

The Preliminary will consist of three assessment tasks. A depth study, a second hand investigation and a final examination. The HSC course will consist of three assessment tasks. A depth study which could either be a second hand investigation, a first hand investigation and a final examination.

MATHEMATICS ADVANCED

INTRODUCTION

Mathematics is a calculus-based course intended to give students who have demonstrated high competence in the skills of Stage 5 Mathematics. The Mathematics Advanced course is focused on enabling students to appreciate that mathematics is a unique and powerful way of viewing the world to investigate order, relation, pattern, uncertainty and generality. The course provides students with the opportunity to develop ways of thinking in which problems are explored through observation, reflection and reasoning. The course provides a basis for further studies in disciplines in which mathematics and the skills that constitute thinking mathematically have an important role. It is designed for those students whose future pathways may involve mathematics and its applications in a range of disciplines at the tertiary level.

WHO WOULD THE COURSE SUIT?

Students who received a Mathematics Grade A in their Year 10 RoSA.
Students wishing to do Extension Mathematics course

COURSE CONTENT

Preliminary Course:

- Functions
- Trigonometric functions
- Calculus
- Exponential and Logarithmic functions
- Statistical analysis

HSC Course:

- Further functions
- Further Trigonometric functions
- Further Calculus
- Financial Mathematics
- Further Statistical analysis

PARTICULAR REQUIREMENTS

Scientific Calculator

ASSESSMENT

The HSC exam is 3 hours long.
Up to 20% of the assessment can come from the Preliminary course.

MATHEMATICS EXTENSION 1

INTRODUCTION

This course includes the whole of the 2 unit (Advanced) course as well as stand-alone extension topics. Extension 1 is focused on enabling students to develop a thorough understanding of and competence in further aspects of mathematics. Students develop rigorous mathematical arguments and proofs, and use mathematical models more extensively. Students will be able to develop an appreciation of the interconnected nature of mathematics, its beauty and its functionality. It provides a basis for progression to further study in mathematics or related disciplines in which mathematics has a vital role at a tertiary level. It is also advantageous for further studies in such areas as science, engineering, finance and economics.

WHO WOULD THE COURSE SUIT?

Students who have demonstrated a mastery of the skills from stage 5.

COURSE CONTENT

The extension content continues studying Calculus topics learnt from the Advanced course as well as establishing new topics. It is intended to give students a more thorough understanding of mathematics at a deeper level.

Preliminary Course:

- Functions
- Trigonometric functions
- Calculus
- Combinatorics

HSC Course:

- Proof
- Vectors
- Further trigonometric functions
- Further calculus
- Statistical analysis

PARTICULAR REQUIREMENTS

Scientific Calculator and student needs to be studying the Mathematics Advanced Course.

ASSESSMENT

The HSC exam is 2 hours long.

FOR MORE INFORMATION

Mrs Sewell

NOTE:

Mathematics Extension 2 candidates should already have made their intentions clear to Mrs Sewell when they were finishing year 10 (Stage 5).

MATHEMATICS STANDARD 1

INTRODUCTION

The Standard Mathematics courses are focused on enabling students to use mathematics effectively, efficiently and critically to make informed decisions in their daily lives.

It is designed to help students improve their numeracy by building their confidence and success in making mathematics meaningful. When students become numerate they are able to better manage a situation or solve a real world problem.

WHO WOULD THE COURSE SUIT?

Students not requiring Mathematics for any further study.

COURSE CONTENT

Preliminary Course – Standard:

- Algebra
- Measurement
- Financial Mathematics
- Statistical Analysis

HSC Course— Standard 1:

- Algebra
- Measurement
- Financial Mathematics
- Statistical Analysis
- Networks

PARTICULAR REQUIREMENTS

Scientific Calculator

ASSESSMENT

Students studying the Mathematics Standard 1 course may elect to undertake an optional HSC Examination. The examination is 2 hours long and is worth 80 marks.

***Note** : Standard 1 Mathematics becomes a **NON-ATAR** course if the examination is not done.

MATHEMATICS STANDARD 2

INTRODUCTION

The Standard Mathematics courses are focused on enabling students to use mathematics effectively, efficiently and critically to make informed decisions in their daily lives.

It is designed for those students who want to extend their mathematical skills beyond Stage 5 but are not seeking the in-depth knowledge of higher mathematics.

The Mathematics Standard 2 H.S.C. course provides a strong foundation for a broad range of vocational pathways, such as T.A.F.E., as well as for a range of University courses such as arts, business, humanities, nursing and paramedical sciences.

WHO WOULD THE COURSE SUIT?

Students not specifically requiring Mathematics at university.

COURSE CONTENT

Preliminary Course – Standard:

- Algebra
- Measurement
- Financial Mathematics
- Statistical Analysis

HSC Course – Standard 2:

- Algebra
- Measurement
- Financial Mathematics
- Statistical Analysis
- Networks

PARTICULAR REQUIREMENTS

Scientific Calculator

ASSESSMENT

The Standard 2 HSC examination is 2½ hours long and is worth 100 marks.

A small percentage of the HSC assessment can come from the Preliminary course.

MODERN HISTORY

INTRODUCTION

In modern history we develop our ability to make sense of the world around us by investigating the historical background of contemporary issues and the forces that have shaped the world, through analysis and interpretation of sources. Our studies develop transferable skills such as posing questions, interpreting evidence, and constructing critical accounts and arguments. We take a critical approach to learning, including developing effective communication skills to convey ideas and judgements, all while learning about the complexity of the world we live in.

WHO WOULD THE COURSE SUIT?

Students will need a personal interest in investigation and a desire to understand their world.

COURSE CONTENT

Preliminary Course:

- Investigating Modern World: The Nature of Modern History and Case Studies (60 hours)
- Historical investigation (20 hours)
- The Shaping of the Modern World (40 hours)

HSC Course:

- Core Study: Power and Authority in the Modern World 1919 – 1946 (30 hours)
- National Study (30 hours)
- Peace and Conflict (30 hours)
- Change in the modern world (30 hours)

PARTICULAR REQUIREMENTS

The Preliminary course is a prerequisite for the HSC course.

ASSESSMENT

Tasks will include source interpretation/analysis, essays and speeches.

MUSIC 1

INTRODUCTION

The nature of music study allows students to develop their capacity to manage their own learning, work together with others and engage in activity that reflects the real world. The purpose of Music 1 is to provide students with the opportunity to acquire knowledge, skills, understanding and attitudes within a broad musical context and encourage the desire to continue learning in formal and informal music settings after school. The course provides students with opportunities to engage in a range of musical styles, including contemporary popular music, and for many, it will serve as a pathway for further training and employment in the music industry or in contemporary music fields.

WHO WOULD THE COURSE SUIT?

Students interested in studying, writing or performing music. Previous music experience not necessary. However, ability to play an instrument or sing is advantageous.

COURSE CONTENT

Preliminary Course:

- Study 3 topics throughout the year.
- Gain a deeper understanding of the Concepts of Music (duration, pitch, structure, texture, tone colour, dynamics and expressive techniques).

HSC Course:

- Study 3 topics throughout the year
- Gain a deeper understanding of the Concepts of Music (duration, pitch, structure, texture, tone colour, dynamics and expressive techniques).
- Students will submit and or complete the practical components of the course in term 3 (80%) and a written examination in term 4 (30%)

PARTICULAR REQUIREMENTS

Students must be aware that Music 1 is a **performing arts subject** and students are required to perform, compose, listen and discuss the course content.

ASSESSMENT

Performance, composition, aural, musicology (viva voce).

PERSONAL DEVELOPMENT, HEALTH AND PHYSICAL EDUCATION

INTRODUCTION

This is a theoretical course - The Preliminary course examines a range of areas that underpin health and physical activity.

In the HSC course students focus on major issues related to Australia's health status. They also look at factors that affect physical performance. They undertake optional study from a range of choices. This includes investigating the health of young people or of groups experiencing health inequities. In other options students focus on improved performance and safe participation by learning about advanced approaches to training or sports medicine concepts. There is also an opportunity to think critically about the factors that impact on sport and physical activity in Australian society.

Who WOULD THE COURSE SUIT?

Students who enjoy research and theoretical components of being active. Please note, there is NO practical sporting component to this course.

COURSE CONTENT

Preliminary Course Core Topics (60%)

- Better Health for Individuals
- The Body in Motion

Optional Components (40%) Students will study 2 options listed below

- First Aid
- Composition and Performance
- Fitness Choices
- Outdoor Recreation

HSC Course Core Topics (60%)

- Health Priorities in Australia
- Factors Affecting Performance

Optional Component (40%) Students will study two of the following options

- The Health of Young People
- Sport and Physical Activity in Australian Society
- Sports Medicine
- Improving Performance
- Equity and Health

PARTICULAR REQUIREMENTS

Nil

ASSESSMENT

HSC exam is 3 hours long. Two option topics are examined.

PHOTOGRAPHY, VIDEO AND DIGITAL IMAGING

INTRODUCTION

Specifically the course combines both practical and theoretical study preparing students to independently create and analyse photographs, and/or videos and/or digital images.

WHO WOULD THE COURSE SUIT?

Photography, Video and Digital Imaging in year 11 and 12 is a Board Endorsed Course offered for students with varying abilities and experiences with Photographic, Video and Digital Imaging. While the course builds upon and relates to elective study in years 9 and 10 it can be studied as a stand alone course.

Study in this area may lead to further post-school study at university or EVET, or vocational training in the context of the workplace. Fields of work this relates to include the Artist, Photographer, Filmmaker and Designer.

COURSE CONTENT

The course offers study in the areas of Wet Photography, Film and Digital imaging. The term 'wet photography' refers to more traditional photographic practices which involve the manipulation of photographic papers and chemicals in the dark room. The term 'video and digital imaging' primarily relates to the use of new technologies that involve the creation and manipulation of both still and moving digital images through the use of scanners, digital cameras, printers, digital video cameras, industry software, stylus', tablets and so forth. The course structure allows for 6-12 modules to be selected in any of these areas, allowing for broad study of all areas or more focused study in selected fields.

PARTICULAR REQUIREMENTS

Today, images can be manipulated, transformed, captured, stored and managed in ways that are unprecedented and in ways that are constantly changing. Students will learn how to develop a more informed and skilled engagement with such practice and work towards self-directed, reflective making of photographic, film and digital work and also critical appraisal of other's work. There is also *Work Health and Safety* component to the course.

ASSESSMENT

Students are assessed with both practical and theoretical tasks. The weighting of practical and theoretical assessments is 70/30 respectively.

PHYSICS

INTRODUCTION

The Year 11 course develops student's knowledge, understanding and skills relevant to the study of motion, how we describe it and what causes it. The course also examines energy in its different forms and how we describe and measure electricity and magnetism and their interrelated effects.

The Year 12 course provides avenues for students to apply the concepts they were introduced to in Year 11 with motion in two dimensions, electromagnetism, theories of light, the atom and the Universe.

COURSE CONTENT

Preliminary Course:

- Kinematics
- Dynamics
- Waves and Thermodynamics
- Electricity and Magnetism

HSC Course:

- Advanced Mechanics
- Electromagnetism
- The Nature of Light
- From the Universe to the Atom

PARTICULAR REQUIREMENTS

Students are provided with 15 hours of course time for depth studies in both Year 11 and Year 12. During this time students may undertake an investigation/activity that allows for the further development of one or more scientific concepts.

A depth study may be one investigation/activity or a series of investigations/activities. Depth studies may be included in one module or across several modules.

Practical investigations are an essential part of the Year 11 and Year 12 courses and must occupy a minimum of 35 hours of course time each year.

ASSESSMENT

The Preliminary will consist of three assessment tasks. A depth study, a second hand investigation and a final examination. The HSC course will consist of three assessment tasks. A depth study which could be either a second hand investigation, a first hand investigation and a final examination.

SOCIETY AND CULTURE

INTRODUCTION

Society and Culture develops knowledge, understanding, skills, values and attitudes essential to an appreciation of the social world. How the interaction of persons, society, culture, environment and time shape human behaviour is a central theme of study. Students develop an understanding of research methodologies and undertake research in an area of particular interest to them. Students are provided with essential concepts, skills, competencies and knowledge to encourage a process of independent thinking that can be used to explain patterns of behaviour, solve problems and engage in and actively contribute to all levels of society.

WHO WOULD THE COURSE SUIT?

Relevant to students wishing to pursue a career in any discipline based Sociology. Forms a valuable foundation for a range of university courses, such as Psychology, Teaching, Criminology, Policing, Social Work, Anthropology and Sociology.

COURSE CONTENT

Preliminary Course:

- The Social and Cultural World
- Personal and Social Identity
- Intercultural Communication:

HSC Course Core:

- Social and Cultural Continuity and Change
- The Personal Interest Project:
- **Depth Studies: Two to be chosen from:** Popular Culture, Belief Systems and Ideologies, Social Inclusions and Exclusion, Social Conformity and Non-conformity .

PARTICULAR REQUIREMENTS

The research findings are presented for external assessment in the Personal Interest Project (PIP). The course deals with areas of study of interest and relevance to students. PIP is worth 40% of the HSC exam mark. It requires students to select a topic of their choice related to the course. They must develop and apply appropriate research methods and submit a completed project for external marking.

ASSESSMENT

Oral presentations and research tasks.

SPORT, LIFESTYLE AND RECREATION

INTRODUCTION

They develop knowledge and understanding of the value of activity, increased levels of movement skill, competence in a wide variety of sport and recreation contexts and skills in planning to be active. Students also develop a preparedness to contribute to the establishment of a health-promoting community that is supportive of its members adopting a healthy lifestyle. This course caters for a wide range of student needs. It can assist students in developing: The qualities of a discerning consumer and an intelligent critic of physical activity and sport. High levels of performance skill in particular sports. The capacity to adopt administrative roles in community sport and recreation. The skills of coach, trainer, first aid officer, referee and fitness leader.

WHO WOULD THE COURSE SUIT?

Student who want to remain active or have a career in coaching.

COURSE CONTENT

The Sport, Lifestyle and Recreation Course is comprised of 15 optional modules.

- Aquatics
- Athletics
- Dance
- First Aid And Sports Injuries
- Fitness
- Games & Sports Application II
- Gymnastics
- Healthy Lifestyle
- Individual Games & Sports Applications
- Outdoor Recreation
- Resistance Training
- Social Perspectives of Games & Sports
- Sports Administration
- Sports coaching & Training

VISUAL ARTS

INTRODUCTION

Visual Arts combines both practical and theoretical study preparing students to independently create and analyse works of Art. More broadly this will develop students capacities in both creative activity and divergent critical thinking which has diverse applications in a constantly changing workforce.

WHO WOULD THE COURSE SUIT?

Visual Arts in year 11 and 12 is a Board Developed Course offered for students with varying abilities and experiences with the Visual Arts. While the course builds upon and relates to elective study in years 9 and 10 it can be studied as a stand alone course.

COURSE CONTENT

Preliminary Course:

Study in the preliminary course gives students a grounding in a broad range of art-making processes. In the Preliminary course students will have the opportunity to gain skills and knowledge in a variety of art-forms that will include a selection of the following; Drawing, Painting, Photo media (darkroom and digital), Printmaking, Textiles, Mixed Media, Graphic Design, Designed Objects, Sculpture, Ceramics, Film, Video and Documented Forms (happenings, performance and installation). The coursework will be organised into 2 negotiated units of study centered upon exploring these various art-forms both practically and theoretically.

HSC Course:

The HSC course builds upon preliminary studies and encourages a more independent approach to Art Making and Critical and Historical studies. In the practical component of the course students will produce one significant major body of work. And in theoretical studies students will complete a variety of mandatory Case Studies that further deepen students knowledge of Art Criticism and History.

PARTICULAR REQUIREMENTS

Practical: Major Body of Work with diary.

Theoretical: Essays, Reviews and Exams.

ASSESSMENT

Students are assessed with both practical and theoretical tasks.

The weighting of practical and theoretical assessments is 50/50 respectively.

VISUAL DESIGN

INTRODUCTION

Designed images and objects such as ceramics, jewellery, clothing, furniture, posters, publications and built environments are closely related to the works produced by artists. Both can communicate ideas about our world and ourselves. Both use visual conventions to define and build social identity. Both may have aesthetic and spiritual dimensions and employ the same materials and technologies. The difference lies in the utilitarian functions of these designs: we sit in them, wear them and drink out of them — functions which designers must take into account .

WHO WOULD THE COURSE SUIT?

The course provides opportunities for students to pursue their abilities and interests in design fields that offer a wide range of tertiary courses and work opportunities. At a more general level it enables students to make design decisions related to their own lives.

COURSE CONTENT

The course has both a practical and theoretical component. Regarding practical work students will design and make images and objects where they will consider how the look, the meaning and the use are all equally important and interrelated. Students are encouraged to explore the practices of Graphic Design (publications, illustration, cartooning, multimedia) , Wearable's (clothing, jewelry, textiles), Product Design (packaging, furniture, industrial) and also Interior and Exterior Design (structures, environments, interiors, stage sets & props). Regarding Theoretical study students examine critical and historical viewpoints of designed images and objects to develop a capacity to analyse and make informed judgments about the designed works that surround them. Students will study 6– 12 Modules throughout the duration of the course organised around some or all of the areas of Design outlined above.

PARTICULAR REQUIREMENTS

Students will produce portfolios, design briefs, objects, exhibitions, critical reviews, essays and sit for exams. There is also *Work Health and Safety* component to the course.

ASSESSMENT

Students are assessed with both practical and theoretical tasks. The weighting of practical and theoretical assessments is 70/30 respectively.

EVET COURSES

Externally Delivered Vocational Education and Training (EVET) courses are delivered by TAFE or other VET Providers. EVET allows school students to gain workplace skills and experience to get a head-start on their chosen career.

EVET allows you to:

- gain practical, work-related skills to enhance your future employment opportunities.
- complete units that count towards your Higher School Certificate (HSC).
- start or complete a nationally-recognised VET qualification while still at school.
- receive a nationally-accredited Certificate qualification or a Statement of Attainment if you achieve in one or more units of competency. Most EVET courses articulate into further nationally accredited courses delivered by TAFE, or other private providers.

EVET courses are offered across a variety of job areas, such as children's services, automotive mechanics, animal studies, human services (nursing), and many more.

EVET courses offer dual accreditation: students who successfully complete these courses will gain unit credit toward their Higher School Certificate (HSC) and will also receive a nationally recognised industry based qualification.

EVET Board Developed Courses contribute to the Australian Tertiary Admissions Rank (ATAR) with students able to sit for an optional Higher School Certificate examination.

Work placement

Many EVET courses include some time working in the industry area of your course. This is called Work Placement and students learn new skills and apply the skills they have already learnt as part of their course. EVET 240 hour Board Developed Courses include mandatory work placement of 70 hours. Board Endorsed Courses may also have a mandatory work placement component.

Work placement helps students to:

- gain insights into the kind of career they would like to have
- make informed decisions about further training and study
- become more employable
- be better equipped for business and employment opportunities.

When applying for an EVET course students and their parents will need to show that career pathway planning is integral to the student's course selection. The student needs to understand the commitment required including:

- the completion of all course requirements, including mandatory work placement
- regular attendance. Students are responsible for arranging their own travel and meeting the travel costs
- timetabling issues which may require students to catch up on class work missed at school.
- having access to the required equipment and resources

Skills at School Virtual VET Courses – NEW for 2022

20 new virtual courses will be added to the EVET Tool. Please investigate these to ensure these courses are suitable for your students and your school site. Details of these courses are outlined in the course descriptor on the EVET website, including if courses have a face to face component. **Only Year 11 2023 students can enrol** in these Skills at School Virtual VET courses. Year 10 2022 early commencement or Year 12 2023 4 Unit x1 is **not available**. HSC exam will be 2024. Refer to the website: [Virtual VET courses \(nsw.gov.au\)](https://www.nsw.gov.au/evet/virtual-vet-courses).

Applications to undertake an EVET course open during term 2. Closing date for first round offers is Term 3 week 8. Students may select more than one course however the first preference will be offered based on course availability. Students must read the course descriptor before selecting the course.

Contact the school's VET coordinator or careers adviser for details on what EVET courses are available and how to apply.

BOS SUBJECTS THROUGH DISTANCE EDUCATION AND VIDEO CONFERENCE

There are other NSW Education Standards Authority subjects which MAY be available through an alternate delivery approach such as Distant Education or Video Conferencing.

Please check the NSW Education Standards Authority Website for other courses which are available

<http://educationstandards.nsw.edu.au/>

Please see Ms Devine, Mrs C Fitzpatrick and Ms Grace about these subjects.

Vocational Education and Training

INFORMATION FOR STUDENTS UNDERTAKING SCHOOL DELIVERED VET COURSES

Public Schools NSW

Wagga Wagga RTO - 90333

The Wagga Wagga Registered Training Organisation (RTO) 90333 is responsible for Vocational Education and Training (VET) courses delivered in NSW public schools.

VET courses offer dual accreditation and students who successfully complete these courses will gain unit credit toward their Higher School Certificate (HSC) and a nationally accredited qualification, Certificate or Statement of Attainment.

NSW Education Standards (NESA) Board Developed Industry Curriculum Framework VET courses contribute to an Australian Tertiary Admission Rank (ATAR).

Students must complete a 240 hour Board Developed Industry Curriculum Framework VET course to be eligible to sit the HSC examination for this course. Only ONE Category B course can be used towards an ATAR.

NESA Board Endorsed VET Courses do not have a HSC Examination cannot be used towards an ATAR.

Refer to the NSW Education Standards Authority website (NESA) for VET, any exclusions, rules and procedures.

Optional External HSC Examination

Students who sit for the optional HSC exam will have an estimate mark submitted to the NSW Education Standards (NESA) by the school. This estimate mark will only be used in the event of a claim of misadventure.

Assessment Procedures

Assessment of students in VET courses is competency based. This means that evidence of achievement of competency is produced by the student, collected by an assessor and judged against agreed industry standards. Assessments include those practical in nature and reflect the type of tasks that would be required to be performed in the workplace and written tasks that assess knowledge and understanding of concepts related to the course.

Evidence of competence can be collected by the assessor in a variety of ways. Like all other HSC courses, some of the evidence collected will be through formal assessment tasks or events such as project work, presentation of portfolios and practical demonstrations. Students are deemed either competent or not competent following an assessment.

No grades or marks are awarded through competency based assessments. The school will provide an assessment scope and sequence for each VET course.

INFORMATION FOR STUDENTS UNDERTAKING SCHOOL DELIVERED VET COURSES

Student Selection, enrolment and induction procedures

Stage 6 VET courses are available to all students in years 11 and 12 upon the completion of a RTO VET Enrolment Form with a validated Unique Student Identifier (USI). Year 9 do NOT undertake “early commencement/acceleration” of Stage 6 VET courses. Your school will seek RTO advice in regards to individual student learning plans.

Students must complete a VET induction in class at the commencement of the course. Students sign a student declaration to confirm that they have completed the induction as part of their enrolment procedures. This induction will include information regarding the specific course they are studying, recognition of prior learning procedures (RPL), credit transfer (CT), assessment procedures, and information regarding student rights and responsibilities. Students are able to refer to the RTO’s Student Guide for VET process and procedure information.

Fees and charges

Some VET courses attract a course cost. Where a course cost exists it will be indicated on the course information page. More detailed information regarding fee charges and refund policies will be provided in the course induction and on the course information sheet.

VET Enrolment

All students enrolled in a VET course must complete the RTO VET Enrolment Form as part of the subject selection process. LLN testing is incorporated in the pre-enrolment process.

Freedom of Information and Privacy

Students’ rights to privacy and access to information are outlined in the Freedom of Information and Privacy policy. All staff members are required to abide by the Department’s Privacy Code of Practice.

Credit Transfer and Recognition of Prior Learning (RPL)

Credit transfer (CT) is available to students who produce evidence of achievement of competency from another RTO. Schools will seek RTO advice on how this CT evidence is to be validated. RPL may also be available to students who can provide sufficient evidence of skills attained previously. RPL applications must be completed on enrolment or before training. Students seeking RPL should follow the RPL procedure outlined in the RTO Student Guide.

Work Placement

Seventy (70) hours of work placement per 240 hours of study is a mandatory HSC component of many VET courses. Failure to complete mandatory work placement will mean that a student will receive an “N” determination for the subject and as a result may be ineligible for the award of the HSC. Students will be provided with additional work placement information in the course induction. Work placement induction will also be undertaken to assist students to be work ready before the first work placement. Students are required to complete a Work Placement Journal during work placement.

INFORMATION FOR STUDENTS UNDERTAKING SCHOOL DELIVERED VET COURSES

School Based Apprenticeships and Traineeships (SBATs)

The SBAT Program provides students with the opportunity to include a recognised VET qualification within their HSC and to combine this with paid work.

SBATs must complete formal training that is delivered by a RTO. The formal training must meet the requirements of the relevant Vocational Training Order (VTO) for that apprenticeship or traineeship vocation, and lead to a nationally recognised qualification. The formal training component of a SBAT will contribute unit credit towards the HSC.

Students wanting to find out more information regarding SBATs should contact the school's careers adviser. The following website is also a key source of information regarding SBATs: www.sbatnsw.info

Unique Student Identifier

All students undertaking Nationally Recognised Training delivered by a Registered Training Organisation must have a Unique Student Identifier (USI) on enrolment.

The USI provides easy access through an online account to all VET training records and results throughout life.

RECOGNITION OF PRIOR LEARNING (RPL) AND CREDIT TRANSFER (CT)

Contact your VET coordinator or trainer if you attend to apply for either Recognition of Prior Learning (RPL) or Credit Transfer (CT). An RPL application must be submitted prior to learning, the Registered Training Organisation (RTO) requires you to apply for RPL prior to or on enrolment. Your VET coordinator or trainer will contact the school Senior Pathways Officer (SPO) before you complete a RPL CT application or apply for CT.

RPL and CT refers to the acknowledgement of evidence of a student's achievement of competencies or learning outcomes. They are processes that allow students to have their previous learning (both formal and informal) count towards their AQF VET qualifications. You will be required to complete an RPL application form prior to or on enrolment. Your VET coordinator will contact your SPO for support in this process.

CT is a process that provides credit for a unit of competency previously achieved. For competencies achieved prior to 2015 to apply for CT you must provide a transcript from a RTO authorised issuing body or the VET Registrar indicating your achievement of the unit/s of competency to your trainer **before the start of the delivery of the UoC**. Units must have the exact code and name or be listed as equivalent in the relevant Training Package for CT to be granted. Evidence of your transcript must be securely stored with the student assessment evidence. **For competencies achieved after 2015** you will be required to complete the Verifiable USI Transcript Process **before the start of the delivery of the UoC** and share the readable PDF to your VET coordinator and RTO Management. Your trainer/VET coordinator will contact your SPO for support in this process.

RPL is an assessment process that assesses the individual student's formal and informal learning to determine the extent to which that individual has achieved the competency standard. Where the outcome of this process indicates that the student is competent, gap training is not required. If you have current knowledge, skills and experience relevant to the unit/s of competency within the VET course you can apply for recognition of prior learning for units of competency within an AQF VET qualification – Use the RTOs Application for RPL of a Unit of Competency form (Form 1, Appendices) and attach supporting portfolio documentation to provide sufficient evidence that you have the required knowledge and skill level to industry standard for the unit of competency. **The RPL application must be completed prior to or on enrolment.**

Your evidence may include but is not limited to:

- relevant documents such as transcripts of relevant training, records or reports
- records of employment/letters verifying tasks undertaken from employers
- finished products, work samples or presentations of the process to completion, performance evidence must be supplied
- portfolio of evidence of yourself clearly demonstrating all the performance criteria, with a description of the performance processes

Students may apply for **recognition of current employment** by using the Student Record for Current Employment application. However this is not RPL for a unit of competency and will assist with recognising work placement hours. This is found in the Student Record Employment section on the career learning website. Under some circumstances, students' part-time work/ or volunteering in an appropriate workplace may be used to fulfil work placement requirements. Applications must be considered prior to the organisation of the scheduled work placement. Application forms are available at::

<https://education.nsw.gov.au/teaching-and-learning/curriculum/career-learning-and-vet/workplace-learning/guides-and-forms>

RECOGNITION OF PRIOR LEARNING (RPL) AND CREDIT TRANSFER (CT)

Please note:

The RTO will offer you an opportunity to apply for RPL and CT. **It is your responsibility as a student to apply, on the relevant RTO RPL form, provide the supporting evidence or seek assistance, prior to or on enrolment. CT applications must occur prior to the delivery of the unit of competency.**

As the student it is your responsibility to initiate applications for CT and RPL and to submit an application to your trainer or VET Coordinator. Your trainer will provide support, including guided access to the details of unit of competency in your application. Your trainer will discuss your experience and possible evidence with you and decide if there is sufficient evidence to support your claim for RPL or CT. You may be asked to bring in some further evidence (for RPL), for resubmission of your application. The outcomes of that assessment will be recorded in your Competency Record.

Evidence must be sufficient to address/demonstrate all the elements within the unit of competency and must indicate industry standard.

Please refer to the APPENDICES for the relevant forms, links and process flow charts.

To apply for RPL for unit of competency refer to the RTO RPL Form. Refer to the RTO RPL flowchart. **Your trainer/VET coordinator will contact the RTO (SPO) for advice.**

To apply for CT for a unit of competency refer to the RTO CT flowchart. **Your trainer/ VET coordinator will contact the RTO (SPO) for advice.**

Appendices – Forms and Process Flow Charts

1. Application for RPL for a Unit of Competency
2. Flow Chart for RPL for a Unit of Competency

RECOGNITION OF PRIOR LEARNING (RPL) AND CREDIT TRANSFER (CT)

Application for Recognition of Prior Learning (RPL) for a Unit of Competency (Form 1)			
<p>Instructions to Candidates</p> <p>Recognition of prior learning (RPL) is the formal acknowledgement of your competency regardless of how, when or where the learning occurred. It may be: formal or informal training and education, work, employment or voluntary experiences. In order to grant RPL, the RTO assessor must be satisfied that you have provided sufficient, current, relevant, valid and authentic evidence to meet the requirements of the unit of competency.</p> <p>To apply for RPL you will need to complete the following steps:</p> <p>Talk to your VET coordinator and trainer about the process, discuss the evidence that you can provide in order to meet all the criteria in the unit of competency. Use the unit of competency from <i>training.gov.au</i> to map the evidence against the elements. Ask your trainer to assist. Please attach the evidence of mapping against each component of the unit of competency and retain as evidence.</p> <p>This RPL application is required prior to or on enrolment and before any training in the qualification</p> <p>Fill out your details on this form, attach your portfolio of evidence and submit the package to your trainer for review</p> <p>Your trainer will forward your application to the RTO for review</p> <p>The RTO will provide feedback, identify any gaps which will require further evidence and/or the completion of the assessment package, or decline the RPL application.</p>

VET ENROLMENT FORM

Public Schools NSW, Wagga Wagga. RTO 90333

VET ENROLMENT FORM

Personal details Full Name _____ Date of Birth ___/___/_____

Privacy Notice: This form contains sensitive information and must be securely stored.

For more information about NCVER's Privacy Policy go to <https://www.ncver.edu.au/privacy>.

NCVER will collect, hold, use and disclose your personal information in accordance with the *Privacy Act 1988* (Cth), the National VET Data Policy and all NCVER policies and protocols (including those published on NCVER's website at www.ncver.edu.au).

The Registered Training Authority (RTO) is responsible for the quality of the training and assessment in compliance with The Standards for RTOs 2015 and for the issuance of the Australian Qualifications Framework (AQF) certification documentation, <https://www.asqa.gov.au/about/australia-vet-sector/standards-registered-training-organisations-rtos-2015>.

Prior to enrolment the RTO provides accurate information that enables the learner to make informed decisions about undertaking training with the RTO. Every student is provided with a specific site VET Course Information sheet that provides qualification information.

Complaints and appeals statement

<https://education.nsw.gov.au/policy-library/policies/complaints-handling-policy>

[For specific RTO procedures please contact your school's VET coordinator.](#)

Fees and Refunds

The school site will advise on fee collection from students. Details are available on each VET Course Descriptor

If you have a disability, impairment or long-term condition, communicate this with your school to ensure your learning is supported.

Has VET learning support been discussed prior to enrolment? Yes / No

Have you completed the LLN Robot quiz or another LLN assessment prior to enrolment? Yes / No* (* if No please discuss this with your school)

Unique Student Identifier (USI)

From 1 January 2015, Public Schools NSW RTO's can be prevented from issuing you with a nationally recognised VET qualification or statement of attainment when you complete your course if you do not have a Unique Student Identifier (USI). In addition, we are required to include your USI in the data we submit to NCVER. If you have not yet obtained your USI you can apply for it directly at <https://www.usi.gov.au/students/create-your-usi/> on computer or mobile device.

Each student must provide the school with their USI number before enrolment in a VET course. This USI must be verified by your school.

Course: **Construction**
Board Developed Course (240 hour)

2 or 4 Preliminary and/or HSC units in total
Industry Curriculum Framework (ICF) -
Australian Tertiary Admission Rank (ATAR) eligible course

By enrolling in this VET qualification with Public Schools NSW RTOs, you are choosing to participate in a program of study which will provide you a pathway towards HSC accreditation and a nationally recognised qualification (dual accreditation). To receive this VET qualification, you must meet the assessment requirements of CPC20220 Certificate II in Construction Pathways (Release 6) & CPC20120 Statement of Attainment towards Certificate in II Construction (Release 3) <https://training.gov.au/Training/Details/CPC20220> & <https://training.gov.au/Training/Details/CPC20120>. You will be expected to complete all requirements relevant to the HSC and adhere to the requirements of NESA. To gain the full qualification in the CPC20220 Certificate II in Construction Pathways, you must achieve 5 core and 5 elective units of competency. A statement of attainment towards either of the qualifications listed is possible, if at least one unit of competency is achieved.

Entry Requirements

You must complete the VET enrolment process, supplying your USI and be assessed for learning support (eg LLN Robot) before the commencement of any training and assessment. HSC: All My Own Work must be completed before enrolling in this qualification. When selecting this course you should be interested in working in a construction environment and be able to use a personal digital device including a personal computer or laptop.

Construction, Plumbing and Services Training Package (CPC 8.0) Units of Competency

Core Units

CPCCWHS2001	Apply WHS requirements, policies and procedures in the Construction Industry
CPCCOM1012	Work effectively and sustainably in the Construction Industry
CPCCOM1013	Plan and organise work
CPCCVE1011	Undertake a basic construction project
CPCCOM1015	Carry out measurement and calculations

Elective Units

CPCCCM1011	Undertake basic estimation and costing
CPCCOM2001	Read and interpret plans and specifications
CPCCCA2002	Use carpentry tools and equipment
CPCCCA2011	Handle carpentry materials
CPCCCM2005	Use construction tools and equipment
CPCCWHS1001	Prepare to work safely in the construction industry

Delete two options not delivered before use and delete this row

Option 1	CPCCBL2001	Handle and prepare bricklaying and blocklaying materials
	CPCCBL2002	Use bricklaying and blocklaying tools and equipment
Option 2	CPCCWF2002	Use wall and floor tiling equipment
	CPCCCM2013	Undertake basic installation of wall tiles
Option 3	CPCCJN2001	Assemble components
	CPCCJN3004	Manufacture and assemble joinery components

White Card

CPCCWHS1001 - Prepare to work safely in the construction industry.
The General Construction Induction Training (White Card) will be delivered as part of this course.

Successful completion of this unit will lead to a General Construction Induction Card (White Card) from SafeWork NSW. This will allow student access to construction sites across Australia for work purposes. A recognised SafeWork NSW GIT card is mandatory before undertaking any Work Placement. **Online courses are NOT recognised by the Department of Education.**

Students may apply for Recognition of Prior Learning (RPL) and /or credit transfer before delivery, provided suitable evidence is submitted.

Pathways to Industry - Skills gained in this course transfer to other occupations

This qualification provides a pathway to the primary trades in the construction industry with the exception of plumbing.

This allows for inclusion of skills suited for entry to off-site occupations, such as joinery as well as carpentry, bricklaying and other occupations in general construction.

EXAMPLES OF OCCUPATIONS IN THE CONSTRUCTION INDUSTRY:

This qualification provides an occupational outcome and a range of support tasks applicable to the majority of construction work sites: carpentry, joinery, bricklaying, labourer

Mandatory HSC Course Requirements

Students must complete 240 indicative hours of course work and a minimum of 70 hours work placement. Students who do not meet these requirements will be 'N' determined as required by NESA. You should be work ready before work placement.

External Assessment

The Higher School Certificate examination for Construction is only available after completion of 240 indicative hours and will involve a written examination consisting of multiple-choice, short answers and extended response items. The examination is independent of the competency-based assessment undertaken during the course and has no impact on the eligibility of a student to receive a vocational qualification.

Competency-Based Assessment

In this course you will work to develop the competencies, skills and knowledge described by each unit of competency listed above. To be assessed as competent you must demonstrate to a qualified assessor the competency requirements for performance and knowledge of the unit of competency.

Appeals and Complaints

You may lodge a complaint or an appeal about a decision (including assessment decisions) by following the Appeals and Complaints Guidelines.

Course Cost: Preliminary - \$60 HSC - \$60 Total for course \$120
School Specific equipment, materials and associated requirements for students

Refunds- Refund arrangements are on a pro-rata basis. Please refer to your school refund policy

A school-based traineeship is available in this course. For more information: <https://education.nsw.gov.au/public-schools/career-and-study-pathways/school-based-apprenticeships-and-traineeships>

Exclusions: VET course exclusions can be checked on the NESA website at <https://educationstandards.nsw.edu.au/wps/portal/nesa/11-12/stage-6-learning-areas/vet/course-exclusions>
